

Hangar (Tea Towel) Instructions

1

60
SEC

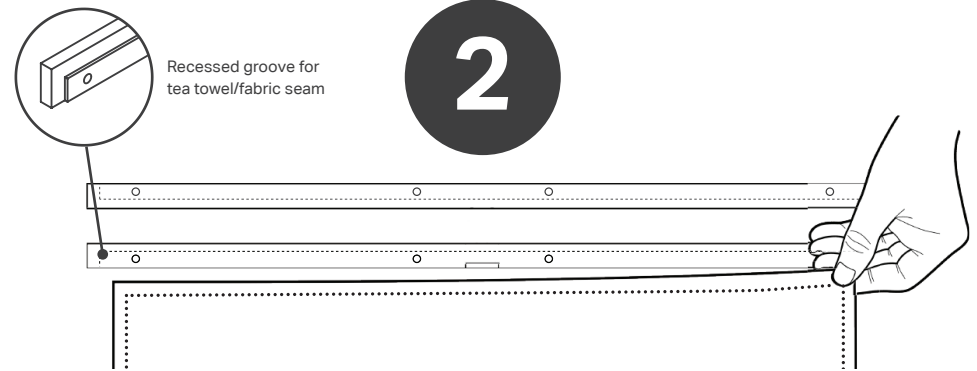

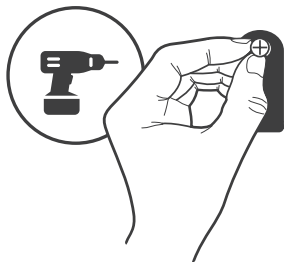

Adhesive*

Ensure surface wall is clean. Apply an adhesive strip at the back of the hook then remove the liner. Place hook onto the wall and press surface firmly for up to 60 seconds. We recommend using a 3M 'self adhesive' strip.

OR

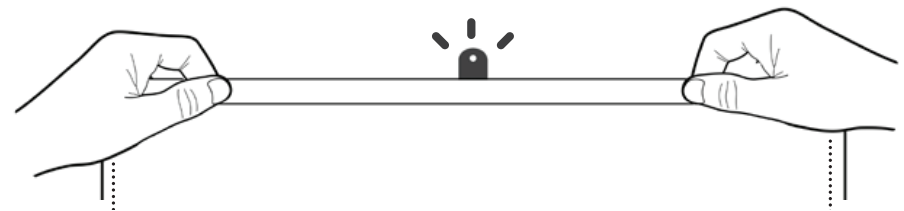

Screw/Anchor

Pre-drill a hole into the wall and tap in the anchor with a hammer. Insert screw through the hole on the hook and directly into the anchor. Drive in screw with a screwdriver or cordless drill until tight. A standard universal anchor or similar is recommended.

Position top and bottom strips on an even surface (top strips have the magnetic hook slot). Carefully place the top of the tea towel/fabric over the magnets with the seams aligned along the recessed groove. Gently lower the front strip onto the other until they click together. Repeat the same process with the bottom strips.

3

Once the tea towel/fabric is ready to hang, align the hook slot located at the back of the top strip with the hook. When you feel the magnet click onto the hook, slide the strip down to secure the hanger in place.

*For 500mm / 700mm sizes - we recommend using these [Command 3M strips](#)

Command 3M strips are readily available from Bunnings, Officeworks or your local hardware store. Please follow the package instructions before hanging.
